

WALLFIT – partners

Be a part of it and revolutionise preabricated and solid house building with the support of **WALLFIT** technologies! Contact us and become an official licence holder of this world novelty!

The facts:

- **WALLFIT** is a new and unique product.
- **WALLFIT** is solid construction – however a lot faster, cheaper and more effective.
- **WALLFIT** is a tried and tested product.
- **WALLFIT** is a win-win product – licence holders, property developers, construction companies, architects, clients – everybody profits from the **WALLFIT** system in many ways.
- **WALLFIT** cuts costs and increases profit margins with higher quality than traditional prefabricated and solid constructions.
- **WALLFIT** is as fast as timber post construction, but solid, high-quality, bespoke and offering a perfect room climate.

WALLFIT is the first system to combine industrially prefabricated house construction with traditional solid construction

– and therefore revolutionises house building!

WALLFIT – quality at its best

- top quality, solid constructions
- certified according to ISO 9001 with factory and site supervision provided by external examiners
- short construction periods due to prefabricated elements
- best thermal insulation reaching passive house standards
- high standard of living and comfortable room climate:
 - ... due to natural building materials
 - ... due to wall heating
 - ... due to wall cooling
 - ... due to air handling units
 - ... due to excellent sound protection
 - ... due to natural heat storage
- bespoke design
- preassembly of electrical installations
- integrated sanitary installations
- high fire-resistance rating
- good value for money
- earthquake-proof construction

WALLFIT – can do more

Wallfit is suitable not only for **private residential buildings**, but also for **industrial and commercial construction work**. The fields of application are almost unlimited.

With **WALLFIT** you can develop:

- single-family homes
- multi-family dwellings
- extensions
- new storeys
- production halls
- warehouses and riding halls
- office buildings
- hotels
- stores and shops
- large developments with 20 storeys and more

Please see our website for a selection of completed buildings

www.wallfit.eu

Good reasons to use the WALLFIT system:

- More construction work in a shorter space of time.
- Very competitive concerning achievement, quality, service, speed and price.
- Increased efficiency on your building sites.
- **WALLFIT** can reduce labour costs on your building sites by 80%.
- Prefabrication in the assembly shop leads to a very high level of quality and is almost independent of seasons and weather.
- The simplified site supervision enables you to take on more work and increase your revenues.
- A lot of work that you have not been able to complete yourself in former times, can now be part of your contract, e.g. fitting windows and doors, installing electrical, sanitary and heating equipment, plastering, rendering, screeding and completing the entire fit-out.
- With Wallfit you can build multi-family dwellings, production halls, warehouses, office buildings, large-scale developments with 20 storeys and more!

A solid house in only 15 days!
